WHY ONELOG?

WE ARE THE MARKET LEADER

Onelog is the market leading technology to manage, connect, report and recover costs associated with content usage. It is designed to work in all law firms regardless of size and be administrated by librarians with minimal involvement from IT.

Our uniquely customisable, automated reports set us apart from others and the proven Return On Investment makes implementing Onelog an easy business decision.

THE RIGHT TECHNOLOGY, THE RIGHT APPROACH

Our focus is on getting things right first time. We only release a new feature once we are sure that it is ready to go.

As well as having the easiest administration in the industry, we also offer automated updates to resources. If a change takes place or if you add a new resource, our central server will effortlessly update your Onelog.

FAIR LICENSING WITH NO HIDDEN COSTS

Our modular system pricing allows you to create the solution that's right for you at a price point that fits within your budget. The base module includes all the reports we are famous for. All other modules can be purchased separately.

Onelog provides unlimited access for unlimited users, and whether you have 50 or 50,000 resources, you will not pay a penny more.

We do not charge for scripting or adding new electronic resources to the system. If you come across a resource that has not been scripted for use with Onelog we add it to the system at no additional charge.

HAVE YOUR SAY

We encourage debate and feedback. For this reason we have an unmoderated forum that can be accessed directly from the Onelog control panel so that you can share experiences.

We hold annual user group meetings so you get to meet us and more importantly other Onelog users. This is all part of the service.

WHY ITS - OUR COMPANY

ITS has over 60 employees and has been in business for over 25 years.

ITS is an ISO 9001:2008 and Investor in People certified organisation. This ensures that our people understand the workings of the company and what their role is in supporting you, our customers.

HIGHLY COMMENDED TECHNICAL SUPPORT

Your Onelog purchase includes on-site training, as we believe face-to-face training and meeting our customers is the best way for us and you to learn the full potential of Onelog. ITS Technical Support is based in both the USA and Europe, which puts us in a unique position to provide unparalleled, extended hours of support.
